FOREWORD

It gives me great pleasure to commend this resource booklet to you. I believe it is especially important at this time for individuals to have the opportunity to develop to their fullest potential. This booklet presents consolidated information on the various tertiary education opportunities available and provides information about what being a tertiary student would involve while at the same time urging girls to take maths and science subjects and to consider study and careers in non-traditional areas. In doing so it will assist young people directly in their personal decision-making as well as providing a valuable resource to those whom young people look to for advice.

The booklet's bias toward the technological arises from a need to address the past discouragements which women have faced in such fields, and to come to terms with the expectation that in the future all members of society will require greater knowledge in these areas.

I urge you to use thoughtfully the information drawn together in this booklet at the various stages in which you are considering future options.

Lynn M. F. Arnold,
MINISTER OF EDUCATION &
MINISTER FOR TECHNOLOGY

May 1985

This booklet was produced through funding provided by
THE COMMONWEALTH GOVERNMENT WAGE PAUSE PROGRAM
administered by
THE SOUTH AUSTRALIAN JOB CREATION UNIT
